• **Safety Precautions**

Please read all instructions before attempting to unpack or install or operate this equipment, and before connecting the power supply. Please keep the following in mind as you unpack and install this equipment:

- Always follow basic safety precautions to reduce the risk of fire, electrical shock and injury to persons.
- To prevent fire or shock hazard, do not expose the unit to rain, moisture or install this product near water.
- Never spill liquid of any kind on or into this product.
- Never push an object of any kind into this product through module openings or empty slots, as you may damage parts.
- Do not attach the power supply cabling to building surfaces.
- Do not allow anything to rest on the power cabling or allow it to be abused by persons walking on it.
- To protect the equipment from overheating, do not block the slots and openings in the module housing that provide ventilation.

1. Introduction

The HDMI™ Audio Extractor is a device that allows you to extract audio signals from your HDMI source. When connecting with a TV or display you don't always get great audio, or in the case of a display, no audio at all, so with this Audio Extractor you can take your original HDMI audio signal and convert it to optical and L/R audio. What this means is that you can output your audio signal to external speakers or extend your audio signal, the HDMI™ Audio Extractor is the perfect choice.

2. Applications

- Game entertainment on monitor
- Demonstration display
- Showroom display

3. Package Contents

- HDMI Audio Extractor
- 5V / 1.2A Power Adaptor
- Operation Manual

4. System Requirements

Input source equipments and output display TV/monitor and or amplifier/ active speaker with connection cables.

5. Features

- Compliant with HDMI 1.3, HDCP 1.2 and DVI 1.0
- Supports HDMI Sample Rates up to 192 kHz
- Supports Optical Sample Rate up to 48 kHz
- Supports TMDS clock frequency rate 225MHz
- Supports high-bit-rate (HBR) audio
- HDMI cable distance testing showed that with 1080p 8bit resolution, the input & output can run up to 15 meters
- Low power consumption
- Supports built-in audio EDID switch of LPCM2,5.1/7.1 or Bitstream
- Supports 3D signal

6. Specifications

Input Port	1 x HDMI
HDMI Sample Frequency	Up to 192 kHz
Optical Sample Frequency	Up to 48 kHz
Output Port	1 x HDMI, 1 x Optical, 1 x L/R
HDMI Audio Format	PCM2/5.1/7.1, Dolby 5.1, DTS 5.1, DD+, D-TrueHD, DTS-HD
Optical Audio Format	PCM2, Dolby 5.1, DTS 5.1
L/R Audio Format	LPCM2
Power Supply	5V/1A linear power adaptor (US/EU Standards, CE/FCC/UL Certified) Or 5V/1.2A switching power adaptor (with universal plug, CE/FCC/UL certified)
ESD Protection	Human body model: $\pm 8\text{kV}$ (air-gap discharge) $\pm 6\text{kV}$ (contact discharge)
Dimensions(mm)	90.7 (W) x 85.8 (D) x 34(H)
Weight(g)	90
Chassis Material	Plastic
Silkscreen Color	White
Power Consumption	100W
Operating Temperature	0°C ~ 40°C / 32°F ~ 104°F
Storage Temperature	-20°C ~ 60°C / -4°F ~ 140°F
Power Consumption	2.1W
Relative Humidity	20 ~ 90% RH (non-condensing)

7. Operation Controls and Functions

7.1 Top Panel

- ① Power LED: The blue LED will illuminate when the power is connected with AC wall outlet, when the power button is pressed to set the device off the LED will turn off.
- ② LINK: The LED will illuminate in green when both the source and the display are sync together. This LED will also blink once while the power is turned on.

7.2 Right Panel

- ① TV/Bitstream/2Ch LPCM switch: This switch allows users to select the input source's audio EDID. When switched to TV it means to select the HDMI audio output that support up to LPCM 7.1, when switched to Bitstream it means to select the both HDMI and Optical output that support up to Dolby 5.1 and when switched to 2CH LPCM that means all audio output of HDMI, Optical and 2CH LPCM will output audio synchronously that support up to LPCM 2CH. Depending on the source's signal, users can select multiple audio output.
- ② Power Button: Press this button switch ON or set the device to standby mode.

7.3 Left Panel

- ① DC 5V: This slot is where you plug the 5V DC power supply into the unit and connect the adaptor to an AC wall outlet.

7.4 Upper Panel

- ① HDMI In: This slot is to connect to source equipment such as DVD/Blue-Ray player with HDMI cable.

7.5 Rear Panel

- ① HDMI Out: This slot is to connect with display TV/monitor and HDMI cable for video and audio signal output.
- ② Optical Output: This slot is to connect with audio equipment such as amplifier system or Hi-Fi speaker with optical cable for audio signal output.
- ③ L/R Output: These slots are to connect with audio equipment such as amplifier system or active speaker with L/R RCA jack for audio signal output.
